

NAVAL STATION TREASURE ISLAND

EPA RPM:	Nadia Burke	(415) 972-3187	burke.nadiahollan@epa.gov
State RPMs:	Remedios Sunga	(510) 540-3840	remedios.sunga@dtsc.ca.gov
	Myriam Zech	(510) 622-5684	myriam.zech@waterboards.ca.gov
DoD BEC:	Keith Forman	(619) 524-6073	keith.s.forman@navy.mil

I. Significant Issues:

- a. Congressional: There were no congressional inquiries during this period.
- b. High-Profile Items: The Navy continues a base-wide radiological assessment to survey and cleanup radiological contamination to meet State of California free-release criteria prior to property transfer. EPA will continue to closely monitor the situation and respond as needed.
- c. Delays in Environmental Restoration Actions: None at this time.

II. Issues Impacting Transfer:

The Navy continues to raise general concerns with the level of California Department of Public Health (CDPH) engagement in the cleanup process, and has requested CHPH management involvement in order to get a better understanding of the radiological free-release criteria and timeframe for State review and oversight needs. The Navy hopes that potential delays associated with review and approval of radiological cleanup plans can be identified and resolved proactively to minimize impact to the transfer schedule.

III. Staffing/Funding Issues:

No changes in staff, however the BRAC funding is expiring and as a result, EPA involvement will be limited in the future.

IV. MOU Support Update:

EPA participated in some of the BRAC Closure Team meetings and continues to support the State's efforts to oversee the Navy's cleanup and property transfer. EPA responded to public and media inquiries by referring them to the State regulatory agencies.
